Ivo Lopes

Senior QA Engineer

mail@ivolopes.com ↗ linkedin.com/in/ivolopesilva ↗ github.com/githubdoivo Porto, Portugal

SUMMARY

QA Engineer with 5+ years of experience testing capital markets and enterprise cloud systems, currently at Euronext Securities. Strengths span BDD automation with Playwright and Cucumber, event-driven validation across Kafka and PostgreSQL pipelines, and load testing to 500-user peak profiles. Delivered 83+ automated specs and 140+ Gherkin scenarios, cutting manual regression effort by ~80%. Brings test strategy ownership and a record of catching critical defects before release to a Senior QA role.

EXPERIENCE

QA Tester · Euronext Securities

Oct 2024 – Present · Porto, Portugal

- Engineered test automation and contributed to test planning across three Euronext securities and instrument-coding platforms, using Playwright/TypeScript, Cucumber BDD, Rest Assured, Artillery and Testcontainers (Kafka, PostgreSQL) to cover E2E, API, RBAC, contract, event-driven and performance testing
- Shipped all assigned project scope with zero post-release defects raised against it, backed by 100% PR-gated GitHub Actions and GitLab CI pipelines with SonarQube quality gates and Jira/Xray requirement-to-test traceability across 15+ user stories
- Delivered 83+ automated specs, 140+ data-driven Gherkin scenarios and 14 load/NFR tests (500-user peak, soak, capacity), cutting manual regression and pre-merge effort by ~80% and new-scenario authoring time by ~40%
- Planned and executed System Integration Testing (SIT) for ISO 20022 message processing across 300+ test scenarios, covering routing, XML-to-JSON transformation, rejection codes, acknowledgements, persistence integrity and negative paths (malformed messages, duplicates, dead-letter routing)
- Set test strategy and SIT priorities as sole QA across multiple squads, translating user stories into traceable test cases and aligning critical-feature coverage with the wider QA team
- Introduced Xray for Jira test traceability, and authored merge-request and defect-reporting templates adopted as team standard
- Mentored new joiners through the company buddy programme and authored the Confluence guide now used for QA onboarding
- Used AI assistants in VS Code with full project context to speed up test case and step-definition authoring, defect investigation and coverage documentation

SKILLS

Programming Languages
Java, SQL, Gherkin, YAML

Test Automation
Playwright, Selenium, Cucumber, Rest Assured, Testcontainers

API & Performance Testing
Postman, REST APIs, Artillery

Testing Types
Manual, Functional, Regression, End-to-End (E2E), UI, Cross-Browser, API, Integration, System Integration Testing (SIT), Event-Driven, Contract, Data-Driven, RBAC, Performance/Load (peak, soak, capacity), Non-Functional (NFR)

Test Design & Management
Test Plans, Test Case Design, Requirements Traceability, Defect Lifecycle Management, Jira, Xray, Confluence

Databases & Messaging
PostgreSQL, Kafka

CI/CD & Quality Gates
Git, GitHub Actions, GitLab CI, Jenkins, SonarQube

Containers & Monitoring
Docker, OpenShift, Coralogix

Cloud
AWS, Azure, Oracle Cloud

Methodologies
Agile/Scrum, Behaviour-Driven Development (BDD), Test Strategy, AI-Assisted Testing, Team Onboarding & Enablement

EXPERIENCE

Cloud Engineer & Quality Tester · Deloitte

Jan 2022 – Oct 2024 · Porto, Portugal

- Owned test planning, test case design and execution across 5+ client engagements, working as sole QA on smaller teams and within QA teams of up to three on larger programmes
- Led a client's full cloud migration programme from application assessment through migration execution, writing the pre- and post-migration test plans that kept downtime to a minimum
- Automated cross-browser and cross-device UI regression tests in Playwright and Selenium, replacing repetitive manual regression cycles
- Monitored daily Jenkins test pipelines, triaging failed runs and flaky tests to keep regression results reliable for each release
- Performed manual functional, regression and integration testing, and queried application databases in SQL to verify data integrity through migration and release cycles
- Logged and tracked defects in Jira from triage through closure and fed UI/UX findings back to development teams to drive usability fixes

CERTIFICATIONS

ISTQB Advanced Level – Test Automation Engineering (CTAL-TAE)	
AWS Certified Solutions Architect – Associate	2023
AWS Cloud Practitioner	2023
Oracle Cloud Infrastructure Foundations	2023
Professional Scrum Master I (PSM I)	2022
ISTQB Certified Tester – Foundation Level (CTFL)	2022
Microsoft Azure Fundamentals (AZ-900)	2022

PROJECT

appdoivo · demo.appdoivo.com

Side project · PWA used by ~50 guests at a real event. 263 automated tests: API/logic, real-browser UI on iPhone SE / 13 / Pro Max viewports, and the public demo's guard rails; Separate BDD end-to-end suite (Playwright + Cucumber, TypeScript) runs daily against the live demo, with a published report; Pre-commit hook and GitHub Actions run the full suite; nothing merges red.

EDUCATION

M.Sc. Mechanical Engineering

University of Minho, Braga, Portugal · 2021

Specialization in Automation and Robotics
